

Course Content Quiz #1

Started: Jan 16 at 2:05pm

Quiz Instructions

Welcome to the ML4T Course Content Quizzes. This quiz covers material from all aspects of the course through the Quiz due date, including but not limited to the Course Videos, Readings, Website, Policies, Guidelines, and Syllabus. **You have 1 attempt at answering each quiz (except the first quiz where you will have unlimited attempts).** Unlike the exams, you may refer to the course materials and the quiz is untimed.

Although the quizzes are open book and open video, they are your individual effort, and **collaboration with peers, classmates, generative AI, or large language models and agents is not permitted.**

The deadline for this quiz is 11:59pmAOE on Sunday.

The grace period does not apply to quizzes and there are no extensions

The answers to each quiz are discussed during the TA Live Discussion following the close of the quiz.

Question 1 1 pts

Which of the following reasons for an assignment extension will **not** be considered by the ML4T Instructional Team? (Select all that apply)

I have a job interview and need the additional time to prepare.

I am taking a second OMS course and it has an assignment due at the same time.

I just got assigned to a new project at work and my time has been filled with work related activities.

I am traveling next week and will not have time to complete the assignment.

I am sick and have a note from my Dr. regarding my illness.

Question 2 1 pts

Select all the statements that accurately reflect our expectations for professional interaction and conduct within this course:

All participants are expected to maintain a professional demeanor when interacting on forums, during TA Live Discussions, and in TA Office Hours.

The course forum is a casual space where students can freely express their frustrations and disagreements.

Engaging in debates during Live Discussions and Office Hours should be done with consideration and respect, avoiding unprofessional confrontations.

Kindness and patience are crucial, as they support a positive and inclusive learning environment, recognizing that everyone learns at their own pace.

Contributions to discussions should aim to enhance the learning experience, offer valuable insights, and seek clarification on complex topics in a constructive manner.

It is acceptable to use a disrespectful tone if you feel strongly about a topic or disagree with another participant.

Question 3 1 pts

Which of the following statements accurately reflects the course's submission policies for code and reports? (Select all that apply)

Both code and report submissions are graded based on the specifically selected (Gradescope) or most recent submission entered into Gradescope (code) or Canvas (report).

Code and reports can be submitted via email or private posts on Ed Discussions as long as they are within the grace period.

After the grace period, late submissions of code and reports are still accepted but will be marked late in Gradescope and Canvas.

Submissions that fail to pass the pre-validation on Gradescope will not be considered for grading or regrade requests..

Question 4 1 pts

Navigate to section 8 of Project 1 on the course website and click on the link to [Course Development Recommendations, Guidelines, and Rules. \(https://gatech.instructure.com/courses/498126/pages/course-development-recommendations-guidelines-and-rules\)](https://gatech.instructure.com/courses/498126/pages/course-development-recommendations-guidelines-and-rules) Review the course guidelines and select all of the statements (below) that are true:

One can import and use the Python os library, which is required to read files.

If you are retaking the ML4T course, you are prohibited from using your submission from prior terms.

One can use any library/package found on the ML4T Local Environment Page

You can share generated charts privately with study group partners.

You must not edit (i.e., add, change, or delete) anything (including spaces) above the line that reads: “—do not edit anything above this line—”.

Question 5 1 pts

Select all the statements that are true according to the course policies on academic integrity:

Cheating on any part of the coursework could lead to receiving a zero for that assignment and possible further disciplinary actions.

Committing to not engage in any form of cheating is a key part of maintaining the integrity and respect within our academic community.

Students found guilty of academic misconduct will not be permitted to withdraw from the semester, and if they attempt to, they will be forcibly re-enrolled without the possibility to make up missed work.

If accused of academic misconduct, a student can withdraw from the class to avoid consequences if the withdrawal is done before the assignment is graded.

Question 6 1 pts

Honor Code Acknowledgement

I hereby confirm that I have reviewed and understand the [Georgia Tech Honor Code](https://policylibrary.gatech.edu/student-life/academic-honor-code) , the [ML4T Course Syllabus](https://gatech.instructure.com/courses/498126/assignments/syllabus) , the [ML4T Course Policy](https://gatech.instructure.com/courses/498126/pages/course-policies) , and the [ML4T Course Development Guidelines](https://gatech.instructure.com/courses/498126/pages/course-development-recommendations-guidelines-and-rules) . I acknowledge my responsibility to uphold the principles of academic integrity and ethical behavior as outlined in these documents.

By acknowledging this statement, I commit to:

1. Conducting myself with honesty and integrity throughout the course.
2. Refraining from any form of academic dishonesty, including but not limited to cheating, plagiarism, and unauthorized collaboration.
3. Respecting the rules, policies, and expectations set forth by the course and the institution.
4. Engaging in the course with a mindset focused on learning, growth, and respectful collaboration with peers.

I understand that any violations of the honor code or course policies may result in disciplinary action, as per the guidelines provided by Georgia Tech and the ML4T course.

Acknowledged
